SUMMARY

Systems Engineering student in my final semesters with a strong interest in automation, Linux system administration, and cybersecurity. I have built practical tools using Python and Bash for log analysis, configuration auditing, and Linux hardening. My hands-on experience includes developing CLI utilities focused on security event detection, system monitoring, and administrative task automation.

I also have backend development knowledge using Java and Spring Boot, applied in personal and academic projects. I am looking to grow my skills in infrastructure, cybersecurity, automation, and software development through real-world projects.

EDUCATION

B.Sc. Systems Engineering

Universidad Industrial de Santander, Bucaramanga, Colombia

July 2021 – Present
10th semester (thesis pending)

WORK EXPERIENCE

Barista

Seasonal / Part-time

Dec. 2023 – Jan. 2026

- Delivered consistent customer service and product quality under high-demand conditions.
- Collaborated effectively within a fast-paced team environment.
- Managed professional responsibilities concurrently with full-time university studies.

PROJECTS

Web Log Security Analyzer

Python · CLI

CLI tool for web server log analysis (Apache/Nginx). Detects SQL injection, brute force, flood/DoS, directory scanning, and access to sensitive paths. Implements per-IP risk scoring and JSON report export.

Config Auditor

Bash · Linux · CI/CD

Linux security auditing tool with modular checks for SSH, firewall, file permissions, and system best practices. Produces a 0–100 security score and supports CI/CD pipelines via a `-fail-under` flag.

Linux Hardening Toolkit

Bash · Linux · Security

Modular hardening toolkit for Linux systems covering SSH, firewall, systemctl tuning, service management, user hardening, and auditd configuration. Designed to automate server hardening from the command line.

Portfolio Website

React · Vite · Tailwind CSS

Personal website built to document and showcase automation, Linux, and security projects. Deployed on GitHub Pages.

TECHNICAL SKILLS

Languages	Python, Bash, Java
Security	Log Analysis, Linux Hardening, System Auditing
Linux & Systems	Linux, Git, GitHub, GitHub Pages
Web Development	Spring Boot, React, HTML, CSS

LANGUAGES

Spanish Native
English B2 – Upper Intermediate
